

# DIAMOND VALLEY STADIUM DEVELOPMENT

The DVBA Executive in conjunction with the DV Users Group has prepared a 50 page booklet for the Review and Development of the Diamond Valley Stadium to all stakeholders and the community for their information. The booklet examines the existing facility and proposes various areas of development and improvement to refresh our existing community asset. The purpose of the booklet is to generate interest and start the process of improvements in consultation with all stakeholders this year – 2014. Please find below a snapshot: of part of the booklet.

## Masterplan

Overall concept plan showing several different areas for development.

## Area 1

Proposed office development on the middle level for the DVBA (already completed in 2012).

## Area 2

Proposed offices and function rooms on the lower level under Court 6.

## Area 3

Proposed offices and storage on the lower level beside Court 5.

## Area 4

Proposed outdoor decking and access from the Café.

## Area 5

Propose new show court next to Court 5.

## Area 6

Proposed new courts beside Courts 2 and 4.

## Area 7

Proposed extra court and court expansion beside Court 4.

The order, staging and timing of any of the development is subject to further consultation with the Council, DV User group and other relevant parties. The next main steps are to obtain estimates of costs, funding arrangements and approvals for each area. Some of the areas can be improved in the short term without enormous costs.

The DVBA Executive is seeking support and comments for the proposed development from all interested parties. Please contact the DVBA CEO Mr Ross Wignell by email: [ross@dvbasketball.com.au](mailto:ross@dvbasketball.com.au)
